## **Hardy Drive Streetscape Project**

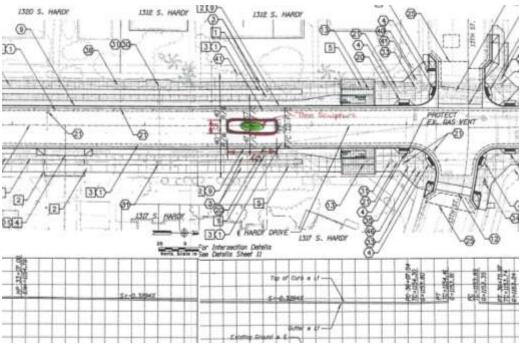

Artwork Concept/Description: The Hardy Drive Streetscape Project will run the length of Hardy Drive from University Drive south to Broadway Road. The artist designed element will be an original monumental sculpture in the median at the corner of Hardy Drive and 13th Street. Palo Verde trees, the artist's inspiration, bloom profusely in the spring. Thousands of tiny yellow flowers dance and spin through the air on the wind, rain down from the trees and cover the ground. The monumental sculpture, an abstract Palo Verde tree, will be fabricated of steel with yellow metal pinwheels – flowers – covering the canopy. When the wind blows the pinwheels will spin, creating a dynamic representation of the flowers and tree. Viewers can reflect on the beauty of the spring all year long on Hardy Drive.
