

# Tempe Environmental Bulletin

June 2016

Volume 12, Issue 2

## ADEQ Multi-Sector General Permit (MSGP) Annual Reporting

The Arizona Department of Environmental Quality (ADEQ) Multi-Sector General Permit (MSGP) specifies annual analytical monitoring and reporting for industrial facilities subject to benchmark sampling, federal Effluent Limitation Guidelines and/or located within 2.5 miles of an Impaired or Outstanding Arizona Water.

Annual reports must be received at ADEQ by July 15, 2016. Learn more about the reporting requirements at the website: <http://azdeq.gov/public-notice-MSGP-2015>

## Why Tempe conducts Inspections of Industrial and Commercial Facilities

The City of Tempe Environmental Compliance Staff carry out the multi-media inspections to see that requirements of the [Tempe City Code](#) Chapters 12 (Drainage & Flood Control), 27 (Sewer & Disposal) and 33 (Water) are being met. Inspections are conducted at facilities to look for potential impacts from the facility on the sewer system, wastewater treatment plant, drinking water system via cross connection, or the municipal separate storm sewer system (MS4). During the site visit, the inspector will review processes and applicable records at the facility and discuss any concerns observed during the inspection before leaving the facility. Questions about the inspection program can be directed to Tempe Environmental Services Section (480) 350-2678.

More information is available about Tempe Environmental Services [online](#).

## It's monsoon season. Be prepared before the storms.

Tempe is offering free sandbags throughout the monsoon season, on a first come first serve basis, at the following locations:

- Tempe Field Services, Rio Salado Parkway & Priest Drive (northeast corner, in the parking lot)
- Benedict Sports Complex, 490 W. Guadalupe Road (northwest corner of Guadalupe and Kyrene roads) – east side of parking lot

For more tips on how to prepare for the monsoon visit.
